MLP & Green & Clean Investments

Everybody is aware of the latest surge of commodity prices and the resulting hike of interests in commodity investments. We have now a new asset class MLP (Master Limited Partnership), which gives us sustainable growth of capital and stable distribution even though it is closely related with natural resources.

There is also a universe of ecology investments, Green & Clean industries, which has to be encouraged to save the earth, but it is promising as well.

We are pleased to have an opportunity where Virginia R. Parker (CEO, Parker Global Strategies LLC), the leading player in those two areas, talks to us.

This is an **invitation only** conference with capacity limited to approximately 20 attendees on a first to confirm basis. If you wish to attend the conference, please register now at <https://24auto.biz/gmac/touroku/aima0423.htm> .

We look forward to seeing you at the conference.
